(13:20 p.m. - 13:40 p.m.)

DESCRIPTION I would like to present your company Redor equipment manufacturer supporting the process of wastewater treatment. Submersible agitators are used for municipal and industrial wastewater treatment plants. They prevent the formation of deposits in the tanks compensatory biochemical processes of wastewater. They are designed to make the movement of fluids, homogenising their composition. The agitators have a direct drive from the engine or through mechanical gears. The mixing element is made of plastic or stainless steel. We deliver the load-bearing structures. Redor is a leading company in the Polish market. Submersible agitators produce more than 20 years. We supply equipment for sewage treatment plants in Poland and South Korea, Spain, the Netherlands and Belarus. We also produce vertical mixers which are used in fermentation tanks and biogas in order to obtain biogas processed into electrical energy. Selected and executed individually according to customer needs. In our offer we also have mechanical transmissions for mining and energy sectors. Redor bases its productions on their own long experience possessed machine park and experienced personnel. We invite you to

cooperation.
